

Summary document on Milestone 41 ‘Start of projects to reinforce biodiversity and/or mitigate climate change effects.’

The Operational Arrangements document requires the following for the milestone reporting of milestone 41 in payment request 3 of the RRF:

Summary document duly justifying how the milestone (including the relevant elements of the milestone, as listed in the description of the milestone and of the corresponding measure in the CID annex) was satisfactorily fulfilled.

This document shall include as an annex the following documentary evidence:

- 1. For each project, copy of published terms of reference for the competitive calls for proposals/tender (link to the calls, specification of period that call was open for applicants, and the technical specifications of the calls).*
- 2. For each project, complete list of contracts/final recipients (anonymised for personal data), location and brief description (in the form of a table for easy navigation).*
- 3. Copies of written contractual or legal documents signed or adopted to testify the start of 41 out of 46 projects.*

A 35 landscape projects for drought mitigation

The Flemish Land Agency (VLM, www.vlm.be) took responsibility for 35 projects of the Blue Deal. These 35 landscape projects for drought mitigation can be divided into 5 groups of projects.

- Local territorial drought deals

The Flemish Department of environment organized a project call in 2022 for local authorities. Seven individual projects received support for their local project on drought mitigation.

The following documents are being made available to testify that these individual projects have started, for this first Blue Deal project on drought mitigation:

Identifier [same as in FENIX]	Name of the evidence. For legal acts please provide the full legal reference and date of entry into force	Short description

- 9 Drought measures carried out by VLM

This set of projects carries the project names and numbers:

2. Graafweide Schupleer
3. De Schomme
4. LIP Kessenich
5. Afbraak Rieme
6. Plasdras
7. IJsevallei
8. Oudlandpolder Zwankendamme
9. Kwetshage
10. Blauwe Toren

The following documents are being made available to testify that these projects have started, for the first series of 10 projects:

- 8 Water-Land-Schap (WLS) projects under 'track 1' (PAD1)

A second set of drought mitigation projects consists of 8 projects of the first generation of Water-Land-Schap (WLS). Their names and number are:

11. Herk en Mombeek
12. Mexiceau
13. Ledegem
14. Roeselare
15. Roosterbeek
16. TMVW
17. UA
18. Wetlands

The following documents are being made available to testify that these projects have started, for this second series of 8 projects (11 to 18):

- 6 Drought measures carried out by partners of VLM.

A last series of 6 projects of drought mitigation projects consists of 6 projects carried out by partners of VLM. These projects are accelerated implementations within the existing plan implementation of land development projects or land development plans or are additional implementations that were impossible or on hold due to budget shortages.

30. Oudlandpolder fase 1

This project implementation is included in the [land development plan](#) as to be carried out with Blue Deal resources.

31. Oostkustpolder

This implementation fits within the [Hazegraspolderdijk and Cantelmolinie land development plan](#).

32. Velddambeek

This RRF project is part of the [Groenhove-Vrijgeweid development plan](#) of the Brugse Veldzone land development project. The Province of West Flanders is responsible for the blue-deal project Velddambeek in coordination with our works in the immediate vicinity (subsidized via Land Development).

33. Burchtse Scheibeek

This implementation fits within the objectives of the [Klein-Brabant and Zwiindrecht land development project](#).

34. Limburgs Landschap

The redevelopment of the Caetswijers is part of the [Land Development Project De Wijers Stiemerbeek-Zusterkloosterbeek](#). Initially, the intention was to draw up a separate LIP for Caetswijers, which also included the redevelopment of this old pond chain ('wijers'). Due to the higher cost price and urgency of the development, we found a new way to realise the project via RRF. At least as far as the ecological and climate-related measures are concerned. The recreational measures are being realised in line with the RFF file via the LIP Reception and experience phase 1. This project is developing the spacious surroundings of the Demerstrand site into a gateway to De Wijers. The RFF file is therefore also relevant in the context of that land development project.

35. Oudlandpolder

This implementation fits within the [Oudlandpolder land development project](#) and is included in the framework agreement that precedes the land development project. The latter is attached as an appendix (M41_P35_2).

The following documents are being made available to testify that these projects have started, for this second series of 6 projects (30 to 35):

B one research program in agriculture

Project 36 has its focus on research on water in agriculture.

In the 2020-2021 call for projects for agricultural trajectories (NL: landbouwtrajecten), 3 of the selected projects (HBC.2020.3159, HBC.2020.3184, and HBC.2020.3198) were financed by RRF funding. This happened in the context of the Blue Deal measures taken by the Flemish Government ([link here](#)). On 28 May 2021, the Flemish Government allocated €6 million to the reinforcement of VLAIO's agricultural trajectories.

The remaining RRF funds allocated to research in the agricultural sector were also dedicated to agricultural trajectories. In the call for projects 2021-2022 document, references were made to additional financial means, in this case RRF funding for projects which fit in the context of Blue Deal measure taken by the Flemish Government. On 21 April 2022, 4 Blue Deal projects were selected (HBC.2021.1052, HBC.2021.1055, HBC.2021.1056, and HBC.2021.1060), and were allocated funding through RRF.

An overview of all beneficiaries for project 36 is shown in document M41_P36_6.

The following documents testify the start of these projects:

D one water management support scheme

Project 39 consists of three different initiatives to support industry in Flanders in improved water management.

The first initiative is the ecology support scheme. The link to this call can be found on <https://www.vlaio.be/nl/subsidies-financiering/ecologiepremie>, and there is a continuous submission possible in this scheme. The following documents testify the start of this support scheme:

Identifier [same as in FENIX]	Name of the evidence. For legal acts please provide the full legal reference and date of entry into force	Short description
M41_P39_1	20191212_Handleiding_EP+	Manual ecological support 2019
M41_P39_2	LTL-EPPlus-2022-05-thema	List of supported technologies 2022

A second scheme is the strategic ecology support scheme. The information on this call, that allows continuous submission, is communicated via <https://www.vlaio.be/nl/subsidies-financiering/strategische-ecologiesteun>. Four projects (for three companies) have received support under this strategic scheme.

The documents that testify the start of this scheme are:

Identifier [same as in FENIX]	Name of the evidence. For legal acts please provide the full legal reference and date of entry into force	Short description

A third part of this project is the call on Blue Deal water saving investments. This call was launched in 2021 (October 4th to October 29th) and a second time in 2022 (May 2nd until July 8th). Information on this call is communicated via <https://www.vlaio.be/nl/subsidies-financiering/blue-deal-waterbesparende-investeringen/wat-houdt-de-subsidie-blue-deal>.

The information testifying the start of this third part of the project is the following:

M41_P39_12	List of projects - final recipients P39	List of beneficiaries for project 39

An overview of all beneficiaries for project 39 is shown in document M41_P39_12.

F two smart water data modules and circular water projects

The two smart water data modules are projects 40 and 41 in the series of 46. They consist of several investments in smart water data.

Project 40 is the development of smart wastewater and rainwater infrastructure by Aquafin.

Through real-time measurements, high-quality open data and by connecting infrastructure with each other, the infrastructure managed by Aquafin will be able to fulfil new functions in the context of climate change and, more specifically, the fight against drought and flooding.

Aquafin is the water treatment company appointed by the Flemish Region. In M41_P40_1 you can find an overview of the Blue Deal projects of the policy domain Environment. Project 40 is included in this list. Via the assignment letter M41_P40_2, Minister Demir assigned this task, including the resources, to Aquafin. The financing of Aquafin is (partly) managed through the drinking water companies. Through ministerial decisions M41_P40_3 and M41_P40_4, the funds for this purpose are allocated to Aquafin.

In the table you can find evidence.

--	--------------	-------------------------------------

Project 41 consists of the realization of automatic water monitoring systems and digital data platforms.

There are several subprojects.

- A. Automatic monitoring network for surface water quality: in 2021 (part 1) and 2022 (part 2) the necessary measuring equipment and associated software were purchased to enable real-time monitoring of surface water quality for specific parameters.

Identifier [same as in FENIX]	Name of the evidence. For legal acts please provide the full legal reference and date of entry into force	Short description
M41_P41_A_1	Bestek Leveren van meetapparatuur en software voor waterkwaliteit in de Vlaamse beken en rivieren – deel 1	Terms of Reference Supply measurement equipment and software for water quality in Flemish streams and rivers – part 1

M41_P41_A_6	Inkooporder – deel 2	Procurement order – part 2

- B. Automatic monitoring network groundwater: the development of an automated monitoring network for groundwater levels consists of several assignments:
- The supply and installation of IoT level monitoring equipment for 440 single- and multi-level wells with approximately 700 measuring filters, spread across Flanders (evidence M41_P41_B_1 until M41_P41_B_3): call open between 1/04/2022-16/05/2022
 - The conversion of existing groundwater monitoring wells with ground-level finishes to above-ground finishes (evidence M41_P41_B_4 until M41_P41_B_8): call open between 01/08/2022 – 30/08/2022
 - The installation of additional groundwater monitoring points (evidence M41_P41_B_9 until M41_P41_B_11): call open between 23/08/2022 -26/09/2022

- C. Automatic monitoring network for surface water quantity: the development of this network consists of several assignments:
- Construction of flow measurement sections, phase 1 (M41_P41_C_1 until M41_P41_C_5) : call open for applicants between 30/08/2022–05/10/2022
 - Construction and installation of the corrected flow measurement structure Ransberg/Velpe (M41_P41_C6- M41_P41_C7): This contract was awarded to Van Hooste through a negotiated procedure without prior publication, building on previously completed work by the same service provider. Therefore, no specific call was issued.
 - Flow measurement point Nieuwpoort (M41_P41_C8- M41_P41_C10): call open for applicants between 15/04/2022–15/05/2022
 - Delivery and installation of 3 new water level and flow measurement systems (M41_P41_C11- M41_P41_C13): call open for applicants: 19/09/2022–30/09/2022, negotiated procedure without prior publication
 - IoT water level measurement modules (M41_P41_C14- M41_P41_C16): call open for applicants between 06/05/2022–16/06/2022

Identifier [same as in FENIX]	Name of the evidence. For legal acts please provide the full legal reference and date of entry into force	Short description
M41_P41_C_1	Bestek bouw debietmeetsecties fase 1	Terms of Reference – construction of flow measurement sections phase 1
M41_P41_C_2	Gunningsverslag bouw debietmeetsecties fase 1	Procurement award report - construction of flow measurement sections phase 1
M41_P41_C_3	Inkooporder bouw debietmeetsecties perceel 1	Procurement order -construction of flow measurement sections parcel 1

M41_P41_C_11	Offertevraag leveren en plaatsen 3 nieuwe peil- en debietmeetinstallaties	Terms of Reference - delivery and installation of 3 new level and flow measurement installations
M41_P41_C_12	Gunningsbeslissing leveren en plaatsen 3 nieuwe peil- en debietmeetinstallaties	Procurement award decision delivery and installation of 3 new level and flow measurement installations
M41_P41_C_13	Inkooporder leveren en plaatsen 3 nieuwe peil- en debietmeetinstallaties	Procurement order delivery and installation of 3 new level and flow measurement installations
M41_P41_C_14	Bestek levering IoT- peilmeetmodules	Terms of reference supply of IoT level measurement modules
M41_P41_C_15	Gunningsverslag levering IoT- peilmeetmodules	Procurement award report supply of IoT level measurement modules
M41_P41_C_16	Inkooporder levering IoT- peilmeetmodules	Procurement order supply of IoT level measurement modules

- D. Digital data platforms: this project consists of the development of different digital dataplatforms and related systems:
- a. The expansion of the climate portal and climate adaptation tools (M41_P41_D_1 – M41_P41_D_6): These contracts were awarded through a negotiated procedure without publication, appointing service providers for the expansion of the climate portal who were previously responsible for its development. No specific call was issued.
 - b. The development of a future vision for the platform www.waterinfo.be (M41_P41_D_7- M41_P41_D_9): there was no specific call, The framework agreement 'Consultancy in Strategic Management' by the Flemish Government was utilized.
 - c. The development of a new website for the Flemish Environment Agency:
 - i. technical assistance (M41_P41_D_10- M41_P41_D_19): there was no specific call, the framework agreement for a Managed Service Provider was utilized.
 - ii. Development of a data-driven website focused on water-related themes (M41_P41_D_20- M41_P41_D_22): call open for applicants: 6/10/2022- 7/11/2022
 - iii. Communication research test panel end users new website: (M41_P41_D_20- M41_P41_D_22): call open for applicants: 6/10/2022- 7/11/2022: there was no specific call, the framework agreement 'research for communication and policy' was utilised.
 - d. The development of a new application for the fish migration database (M41_P41_D_26- M41_P41_D_28): there was no specific call, The framework agreement 'Consultancy in Strategic Management' by the Flemish Government was utilized.
 - e. The development of a new dataplatform for the Flemish Environment Agency (M41_P41_D_29- M41_P41_D_48):
 - i. Setup Tibco environment: there was no specific call due to the limited cost
 - ii. Technical support for several issues concern the data platform: there was no specific call, existing framework agreements were utilized
 - f. The development of an operations database (M41_P41_D_49- M41_P41_D_52): there was no specific call, the framework agreement for a Managed Service Provider was utilized.
 - g. The optimisation of the data warehouse for the surface water quality monitoring network (M41_P41_D_53- M41_P41_D_60): there was no specific call, the framework agreement for a Managed Service Provider was utilized.

G four areas for nature-based solutions

This scheme of the Blue Deal is based on four 'Vlaggenschipprojecten' for nature based solutions. In three of these projects, land purchases have been initiated and realized. In the fourth project (Complex Project in the Dunes) of the Blue Deal, several nature-based solutions are realized, but no land purchases and the realizations are not financed with the down-sized RRF budget of the Blue Deal. For this reason, three projects – 43, 44, and 45 – are part of the 46 Blue Deal projects.

Project 43 is the Blue Deal project for the Zwarte Beek:

<https://bluedeal.integraalwaterbeleid.be/projecten/vlaggenschipprojecten/vlaggenschipproject-zwarte-beek>. Land purchases have been initiated and carried out. The documents to testify this can be found in the following table.

Identifier [same as in FENIX]	Name of the evidence. For legal acts please provide the full legal reference and date of entry into force	Short description
M41_P43_1	Landpurchase Vlaggenschipproject ANB 1	Real estate purchase deed for purchase of 154,2 ha in the catchment of the Zwarte Beek
M41_P43_2	Land purchases RRF Blue deal (Vlaggenschipprojecten)	Overview table on the land purchases for projects 43, 44, and 45 with amount and area for each project.

Project 44 is the Blue Deal project for the Kleine Nete:

<https://bluedeal.integraalwaterbeleid.be/projecten/vlaggenschipprojecten/vlaggenschipproject-kleine-nete>. Also for this project, the foreseen land purchases have been initiated and executed. The following documents testify this.

Identifier [same as in FENIX]	Name of the evidence. For legal acts please provide the full legal reference and date of entry into force	Short description
M41_P44_1	Landpurchase Vlaggenschipproject ANB 2 Principieel_akkoord_verkoop_gronden	Principal agreement by the community of Herentals to sell 6,7ha of land to ANB for Vlaggenschipproject Kleine Nete

The document M41_P43_2 contains the detailed information that 6,7 ha is involved in this project.

Project 45 is the Blue Deal project for Rivierherstel Leie (river restoration for the Leie):

<https://bluedeal.integraalwaterbeleid.be/projecten/vlaggenschipprojecten/vlaggenschipproject-rivierherstel-leie>. Also for this projects, the foreseen land purchases have been initiated and executed by VLM (the Flemish Land Agency). The following documents testify this.

Identifier [same as in FENIX]	Name of the evidence. For legal acts please provide the full legal reference and date of entry into force	Short description
M41_P45_1	Landpurchase Vlaggenschipproject ANB 3 21GBRL06 Br. aanvaarding aanbod	Agreement Letter from VLM to owner of 8,4 ha in 2021
M41_P45_1a	Landpurchase Vlaggenschipproject ANB 3 21GBRL06 auth. akte	Real estate purchase deed for purchase of 8,4 ha
M41_P45_2	Landpurchase Vlaggenschipproject ANB 3 2021_GB Rivierherstel Leie	Budgetary claim from VLM for the land purchase in 2021 for Rivierherstel Leie
M41_P45_3	Landpurchase Vlaggenschipproject ANB 4 2022_GB Rivierherstel Leie	Budgetary claim from VLM for the land purchase in 2022 for Rivierherstel Leie

The document M41_P43_2 contains the detailed information that 8,4 ha is involved in this project in 2021, and 83,2 ha in 2022.

I wetland restoration

Project 46 focusses on wetland restoration by a series of initiatives.

- A. Project subsidies for land purchases to support private environmental organisations in wetland restoration

Under this schema, 24 project subsidies have been launched for Blue Deal land purchase. This corresponds to an amount of 22.792.555,25 euro on 861 ha.
